TECHNOLOGY AT THE SERVICE OF SHAPES

GIULIA STAMPAGGI

*Solutions, technologies
and products for the industry*

Giulia Stampaggi S.r.l. was founded in 1997 based on the years of experience of its owner in cold forming of metals for third parties. The production facility is located in the Treviso Province, and specializes in the construction of progressive dies and metal forming on behalf of third parties, starting from an idea, a drawing or

specifications provided by the customer. The company produces items in brass, copper, bronze, aluminum, Stainless Steel, Fe and high-strength materials, titanium and delivers the finished items, complete with finishing treatments, also assembled with plastic parts, packaged and coded using bar code or 2D systems (Qr-code).

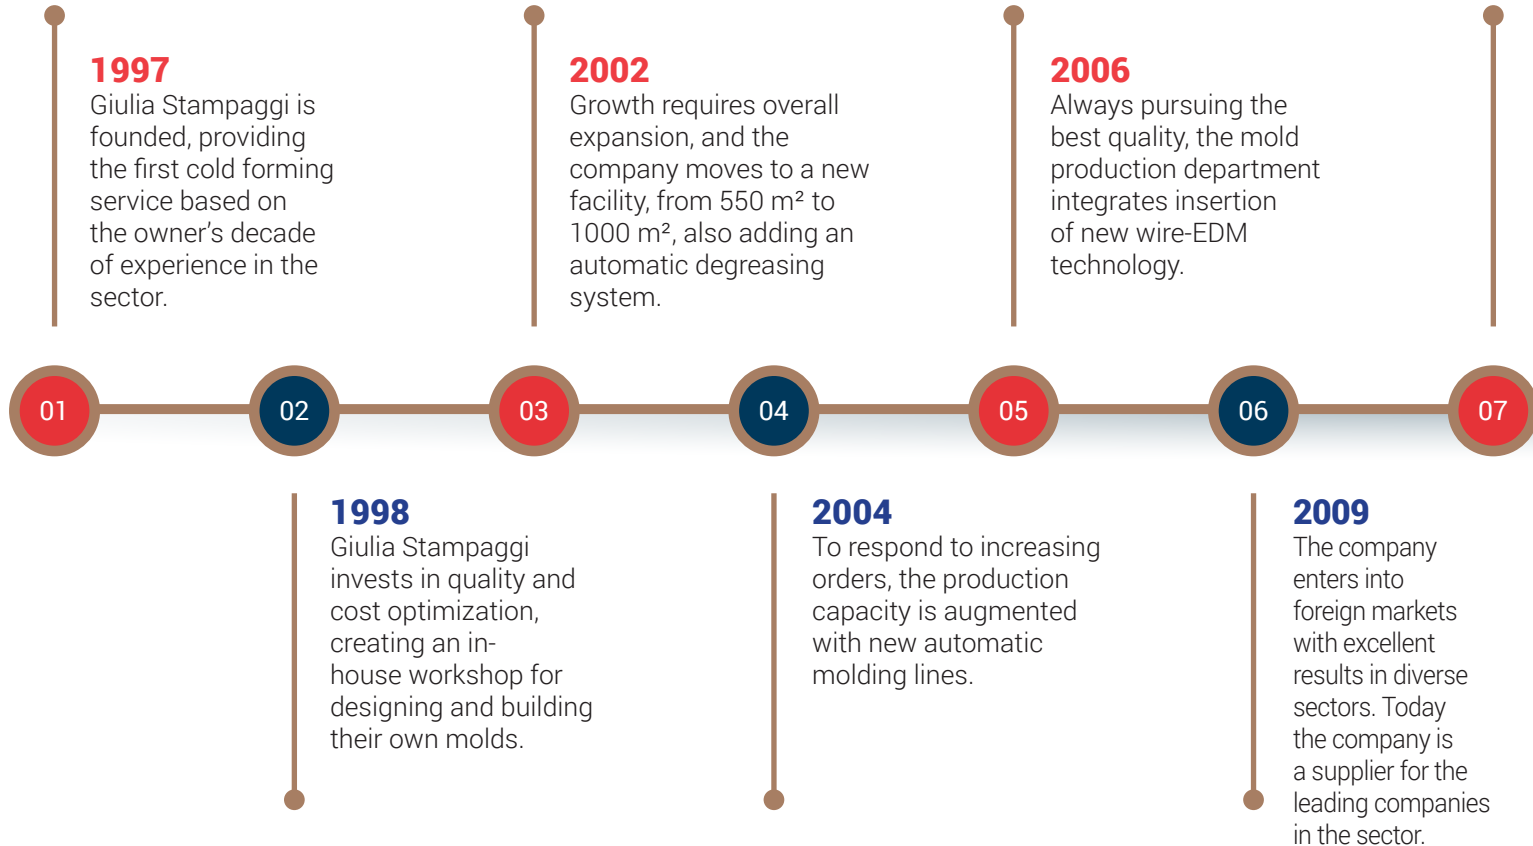

TWENTY YEARS OF INNOVATION

We produce products through cold forming for international markets

We have always worked for large groups of companies, all of whom have placed their loyalty in us for years. Today we are growing with them into foreign markets, providing services and products to many European companies. Giulia Stampaggi is determined to increase their presence in Europe even more, with services that go beyond the concept of mere production. In fact, we work together with companies to study and overcome limits with innovative solutions to guarantee competitive production advantages.

Place your trust in a story built on

innovation and commitment

2010

Production requires further expansion, and Giulia Stampaggi grows from 1000 m² to 1500 m².

2012

To provide added services to their customers in Italy and abroad, Giulia Stampaggi opens a new metal finishing and automatic assembly department.

2016

Giulia Stampaggi invests in a new facility more suited to its forecasted growth into foreign markets, now reaching 4000 m².

08

2011

The company is equipped with new production lines, now with 10 automatic molding lines.

09

10

2015

Growth over recent years requires additional production lines, and Giulia Stampaggi invests in more lines, increasing production from 10 to 13 lines.

11

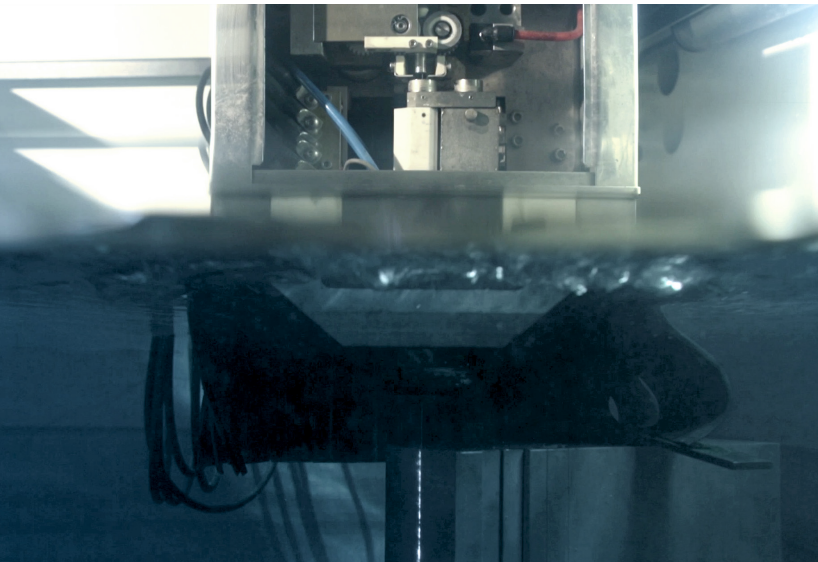

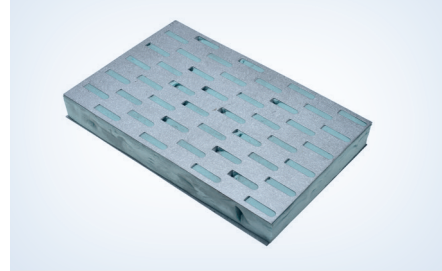

12

2017

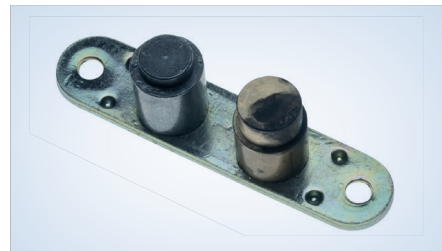

The company is currently in the process of obtaining ISO certification and is preparing for new investments in specialized personal and production quality.

To guarantee maximum quality and flexibility, we design and produce our molds in-house. This also means we can ensure the highest quality standards and fast production.

We produce and assemble metallic components, offering our customer a complete service.

We design, produce, innovate

Our extensive experience allows us to not only focus on production, but also to analyze our customer's work flows and provide strategic consulting services that go far beyond only supply. We have improved our product through innovating our customers' productions, helping them to reach important competitive advantages.

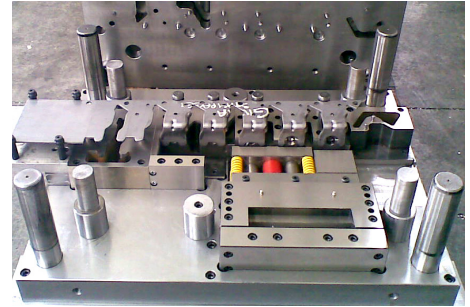

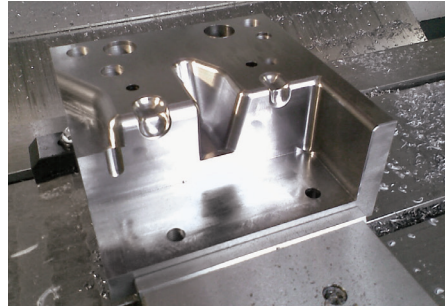

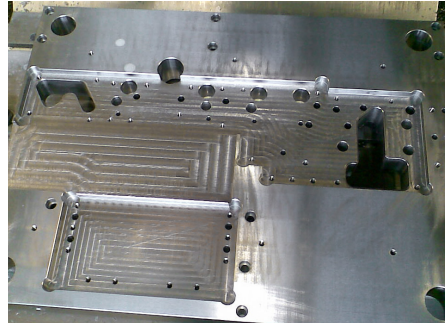

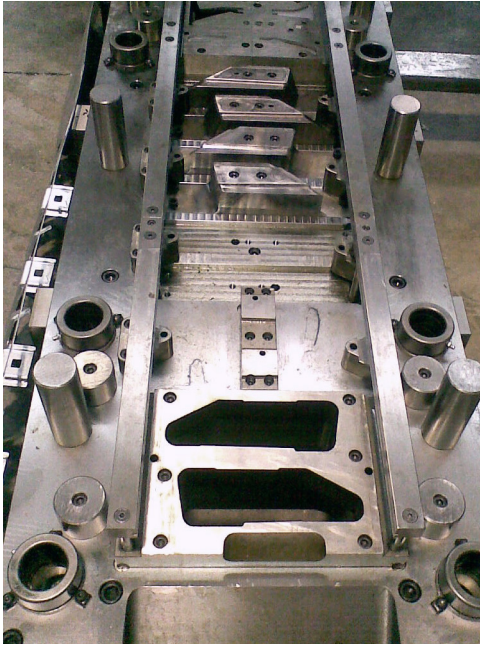

Custom processing

Over time, Giulia Stampaggi has innovated and adapted to clientele, combining experience and innovation. We produce molds according to a custom process, transforming the customer's drawing into reality thanks to the experience of our specialized staff, guaranteeing the most valid solution for different problems, implementing custom applications for every possible kind of request.

Our process, starting from a drawing

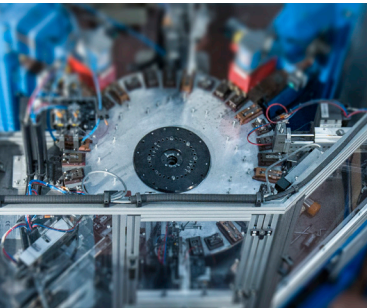

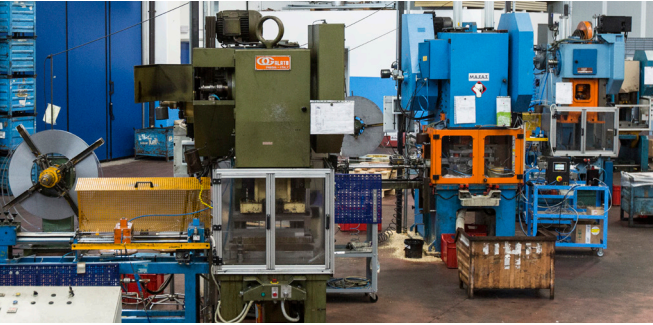

- Study and analysis of products.
- Selection of materials in respect of adopted specifications.
- Cost estimates.
- 2D and 3D design of equipment and components.
- Construction of prototypes and models

Mold construction

Thanks to our technical department equipped with CAD CAM systems, we design all types of molds in-house, in full respect of project specifications. We validate the correct production quality and efficiency of the mold.

Production

Giulia Stampaggi is a company successfully operating both in Italy and abroad for more than 20 years in the cold forming sector. The company avails of a production area spanning 4000 m² with an extensive machinery fleet, allowing them to independently

provide a wide range of services, always with the speed and quality that characterize the company. The production departments: Automatic molding, Tumbling, Degreasing and finishing, Automatic assembly, Manual assembly, Quality Control, Packaging and labeling.

Warehouse

To guarantee rapid product deliveries, Giulia Stampaggi is equipped with a warehouse based on a LEAN and KANBAN system, ensuring rapid order fulfillment to meet the urgent demands of their customers.

A photograph of an industrial robotic cell. The cell is enclosed in a metal frame with a safety mesh. Inside, there are various mechanical components, including a robotic arm with a blue and red cable bundle. The background shows a factory setting with other equipment and lighting. A large red diagonal shape is overlaid on the right side of the image, containing the text.

Fields of application

The requirements of our customers, and a passion for the technology and precision necessary in this market have driven continuous improvement in our techniques, always pursuing more quality and flexibility in our production, ensuring constant growth in numerous sectors.

Electromechanical

In the electromechanical sector, we provide small and medium items for internal contacts and mechanical parts in devices.

Furnishing

We work with manufacturers of furnishings to produce brackets, shelves, tops and many other articles used for wall fittings and shelving.

Automotive

We supply components for the engine compartment, electrical systems and cabin.

Doors and windows

We produce components for the doors and windows sector, where the aesthetic quality of the products must be excellent and free of defects.

Electrical

Thanks to the right machinery, we produce very small size components while still maintaining precision and quality.

Appliances

We produce metallic components for home appliances and assemble them with plastic, supplying semi-processed pieces ready for final assembly.

General mechanical

We produce everything from simple sheet metal to luxury watch cases, evaluating the best solutions on a case by case basis.

Sports

We have worked in the sports sector for 20 years, specializing in the production of components for prestige ski boots.

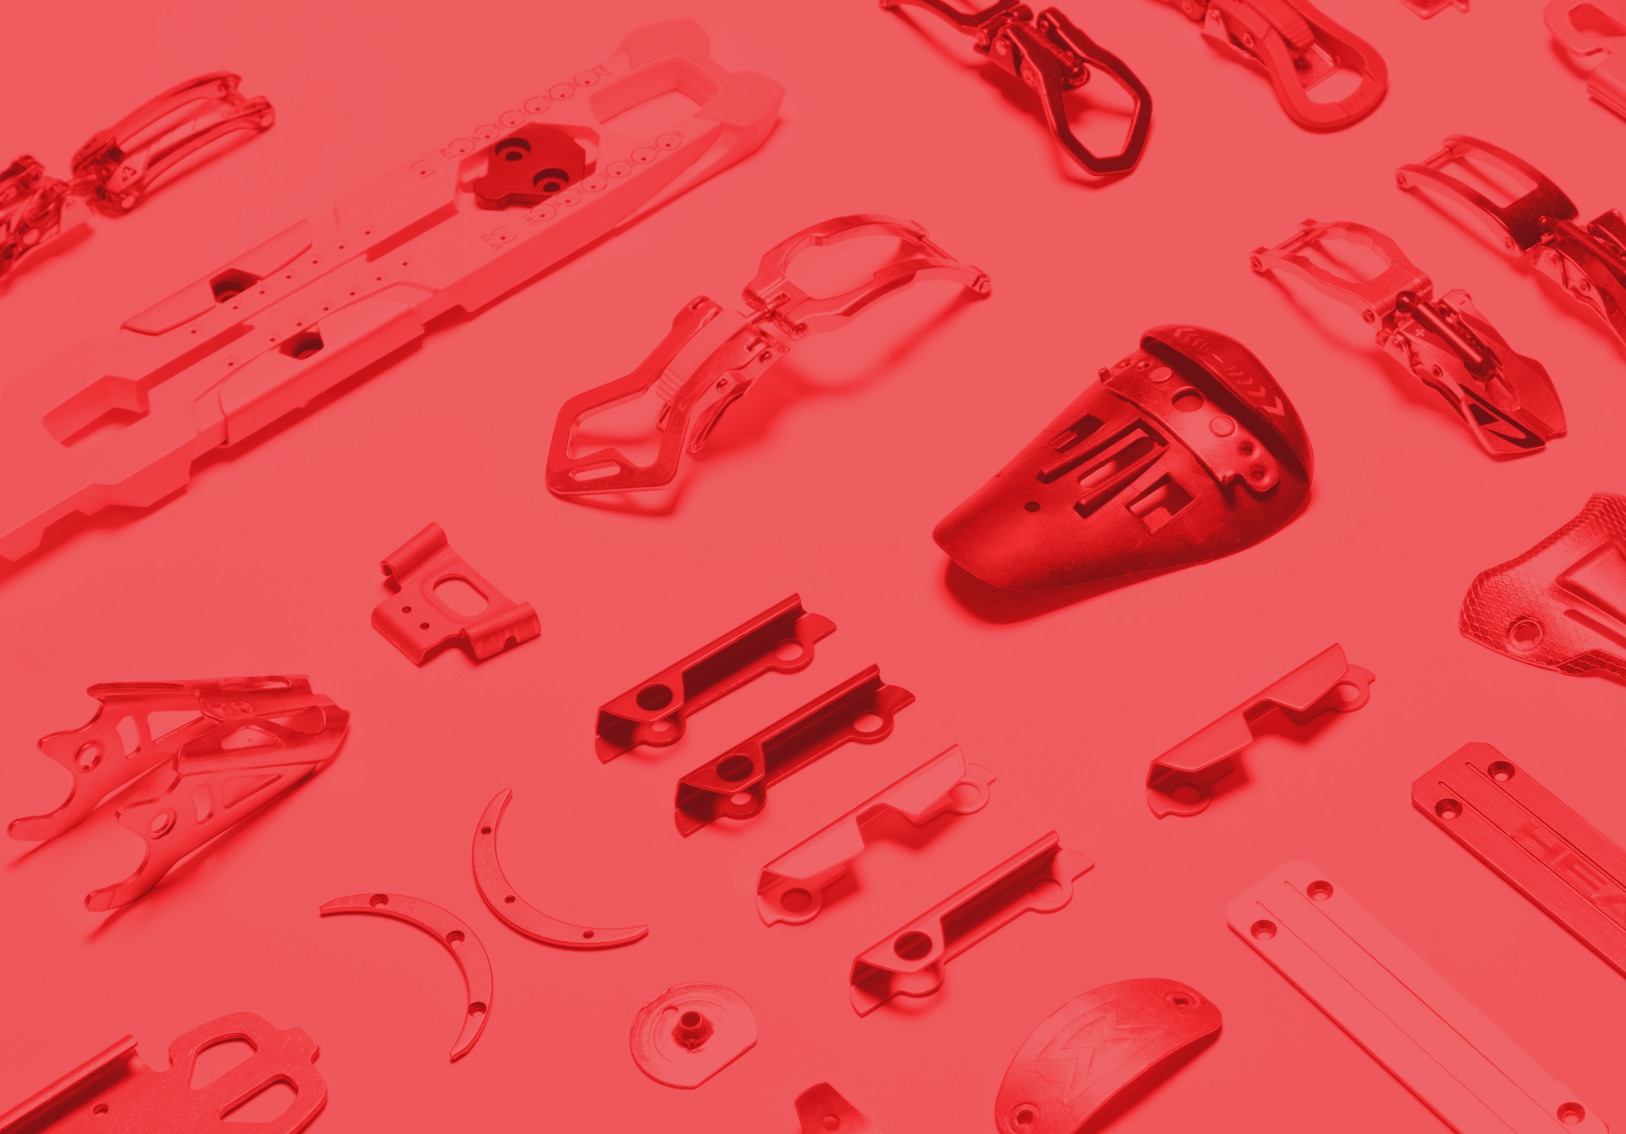

Quality control

Strict controls on molds and production of components by highly qualified staff using the most advanced instruments ensure that our production process is always precise, also for very complex items, without waste, loss of quality or time.

Supplying excellence

We are the suppliers for the most precise, detail-oriented customers, and we have designed our production and control processes based on the needs of a very demanding international clientele, whose requirements we always satisfy fully.
